

Dear supporters:

Thank you for your support. Open Source Chain has reached our goal. Every Ether represents your expectation and our drive to move forward. Open Source Chain will maintain our commitment and strive to make “Open Source Chain, the Blockchain that continuously creates value for community”.

To protect supporters’ interests, we have arranged listing in Japan’s top exchange, BTCBox and Singapore’s most reputable exchange, Digifinix, on May 13, 2018. The token symbol is OSCH.

Some of the supporters may have used their exchange wallet to wire their Ether. Wiring tokens to such wallet address will likely lead to loss of token. We will try to reach everyone to collect correct recipient address before token distribution. If you have not received your token by 23:59, May 12, 2018. Please contact us for remedy.

We are still open to participation amount less than 10 ETH until 23:59, May 12, 2018 but lock up period applies. If you desire to wire greater quantity, please contact our community manager directly.

Thank you again for your support and generosity.

OSChain Foundation

Will Zhang, CEO
